

It Pays to Be a KAP Member!

AgExpert

Spring is just around the corner, and there are many things to plan for on the farm. If you're looking for an easier method track crop inputs and field records, or a way to run some "what if" scenarios to help find out what production strategy will do the most for your bottom line, try [AgExpert](#) Field Manager PRO 2007.

KAP is pleased to include a wide range of AgExpert products as a preferred supplier to our member benefits program, and this year the features available to farmers have dramatically improved.

AgExpert Field Manager PRO 2007 software gives users access to all crop production data at any time. This *field management system* now includes two software programs to manage your input and yield records by field: the Field Manager PRO Desktop for the PC and Field Manager PRO Mobile for a Windows 5.0 handheld.

With the new system, farmers are able to create detailed input plans and calculate different scenarios and rotation options that illustrate the different expenses you can expect. By entering day-to-day field activities, farmers can also quickly analyze field histories, track information for compliance with government programs and legislation, and improve overall farm management.

For more information on this product go to www.agexpert.ca, or call AgExpert at 1-800-667-7893.

To order AgExpert and save \$90 through the KAP program, call 1-866-527-0123 for a form or e-mail your request to kapbenefits@stratabenefits.ca
