

It Pays to Be a KAP Member!

Best Doctors

KAP is pleased to announce [Best Doctors](#) has been added to their Core and Core Plus Health Benefits Program. Best Doctors currently serves 2.5 million Canadians, providing its members with expert medical advice to assist in making informed medical decisions.

How It Works...

If you or your doctor suspect that you have one of the covered medical conditions, you simply contact the Best Doctors Member Care Centre. You'll be connected to a Personal Advocate, a registered nurse, who will be dedicated to you through diagnosis, treatment and recovery. The first thing the Personal Advocate will help you do is to submit forms, which allows Best Doctors to collect all of your relevant medical information. Best Doctors can then proceed with a review of your specific medical situation.

This information is forwarded to a team of specialists who are affiliated with the renowned Harvard Medical School in Boston. Through exhaustive research, this team will help make sure that no stone is left unturned, to help ensure that your diagnosis is correct and that the recommended treatment is the best.

Based on those findings, a detailed report is sent back to you and can (with your permission) also be sent to your doctor. Your Personal Advocate will call to explain the diagnosis, recommended treatment and what your best options are.

A Unique Service for Rural Manitoba

"Best Doctors can offer peace-of-mind to our members, who will know that this service provides them and their local medical team with current information about their diagnosis and the latest advances in treatment when they are faced with a serious medical problem," says Glenn Young, chair of KAP's Member Benefits Committee. "It's a very knowledgeable second opinion that will help to connect rural people with experts from Harvard-affiliated doctors."

KAP members wishing to enroll in only Best Doctors will also have this option, although with some pre-existing limitations. KAP members can call the [Member Benefits](#) Toll-Free Hotline at 1-866-527-0123, ext 1 to receive more information.
